SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence and Data Science with hands-on experience in SQL-based analytics and machine learning model development. Built end-to-end data analytics and CNN-based medical image classification projects. Strong foundation in Data Structures and Python, actively preparing for data-driven and backend engineering roles.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science

Pranveer Singh Institute of Technology | 2023 – 2027

CGPA: 7.0

CBSE 12th: 70% (2022–2023)

CBSE 10th: 85% (2020–2021)

TECHNICAL SKILLS

Programming: Java, Python, SQL

Backend: Node.js, REST APIs, JWT Authentication

Frontend: React (basic), HTML, CSS, JavaScript

Databases: MySQL Workbench, Oracle Database

ML/AI: CNNs, TensorFlow, PyTorch, NumPy, Pandas, OpenCV

Computer Science: DSA, OOPs, DBMS, OS, Computer Networks

Tools: Git, GitHub, Linux, VS Code, Jupyter, Google Colab

Soft Skills: Problem-Solving, Communication, Teamwork, Time Management, Analytical Thinking

PROJECTS

MySQL & Python Retail Sales Analytics Project

- Designed and normalized a relational database schema in MySQL to manage 10,000+ retail transaction records.
- Performed data cleaning, transformation, and exploratory data analysis using Python (Pandas, NumPy).
- Generated visual dashboards using Matplotlib and Seaborn to identify 15% high-performing product categories.
- Identified revenue leakage and seasonal demand patterns to improve decision-making insights.

Tumor Detection System – Medical Image Classification

- Built a Convolutional Neural Network (CNN) model using TensorFlow and PyTorch.
- Processed and augmented 3,000+ MRI images using OpenCV.
- Achieved 90%+ classification accuracy with optimized hyperparameters.
- Reduced model overfitting using dropout layers and early stopping techniques.

ACHIEVEMENTS & CERTIFICATIONS

- Completed coursework in DSA and DBMS.
- Python / Cloud Fundamentals certification.
- AI Foundation Associate – Oracle
- Cloud Infrastructure Data Science Professional – Oracle
- Participated in coding contests and hackathons.

JOB SIMULATIONS / VIRTUAL INTERNSHIP

Data Analytics – Deloitte

- Cleaned and analyzed client datasets using Excel and data visualization techniques.
- Identified key business insights and presented findings in a structured report format.
- Applied analytical thinking to solve business performance and operational problems.

GenAI Powered Data Analytics – TATA

- Worked on AI-driven data analytics use cases using Generative AI concepts.
- Interpreted structured and unstructured datasets to generate automated insights.
- Designed data-driven recommendations to improve business decision-making.

Solution Architecture – AWS

- Designed a scalable and secure cloud architecture for a business use case.
- Selected appropriate AWS services based on performance, security, and cost optimization.
- Implemented high-availability and fault-tolerant system design principles.
